

## High motion, technical shooting environments is where I stand out as a DP

Because of these skills, and choosing to work on content that matches my personal life, I specialize in Automotive, Athletic, Outdoor, and Lifestyle work. Gimbal Operating and my Camera Car System are other areas I specialize in. Beyond my specialties, I have developed an eye for framings with over a decade of work in Documentary style filming and Handheld Operating. Skilled in using both Natural Light or Instruments to craft the look.

### CAMERA CAR RIG

---

The rig is a budget friendly setup that allows a wide range of camera angles with out re-rigging. With time spent on choreography it can afford a wide variety of dynamically moving shots. The system can come with me as a DP, or I work plug and play with other crews as specialty cam to handle rigging, gimbal wrangling and operating for other DPs. A primer for productions interested in the rig can be seen [HERE](#).
